

Digital Music Streaming Output

OVERVIEW

DMS-OUT allows you to integrate a Total Control DMS system with a third-party audio video receiver. Additionally, a fixed or variable output enables you to integrate an amplifier without the need for a pre-amplifier. The DMS-OUT also enables room linking when used with a two channel or 70V amplifier.

- Digital music streaming output for Total Control system
- Bridges a Total Control DMS multi-zone system to a third-party A/V receiver
- Enables third-party amplifiers to access DMS audio streams
- Plays any DMS source through a sound bar
- Works with MFS-8 or MFSPOE-8 network switch
- Mounts easily to wall or cabinet with integrated bracket
