

Z-Wave® Gateway

**OVERVIEW**

Z-Wave gateway expands system control for Z-Wave based products such as lighting, thermostats, door locks, motorized shades and security devices such as motion detectors and surveillance cameras. Web-based dealer and end user portals make it easy to set up accounts, integrate products and create Z-Wave scenes.

- Z-Wave gateway expands control for Z-Wave devices
- Connects to LAN via Wi-Fi or wired Ethernet
- Features WPS (Wi-Fi Protected Set-Up) for fast, secure programming
- Provides two-way control of lighting, thermostats and door locks
- Provides one-way control via URC Home mobile app for other types of Z-Wave devices
- Enables macro integration with Z-Wave scenes
- Visit [www.z-wavealliance.com](http://www.z-wavealliance.com) for Z-Wave products available in the United States

**HIGHLIGHTS**

- Dealer Portal** Web-based dealer portal for end user account set-up
- End User Portal** Web-based end user portal with Set-Up Wizard for easy configuration
