Operating Instructions For

UR2-DTA

UIT Remote Control

1. Introduction

The UR2-DTA is designed to operate the SIA, Pace Micro, Motorola and IPTV set tops, plus the majority of TV equipment on the market as shown below.

D TA : DTA boxes, IPTV set tops

T V : Televisions

2. Replacing Batteries

Before you program or operate the remote control, you must install two new AA alkaline batteries.

STEP 1: Remove the battery compartment cover on the back of your remote.

STEP 2: Check battery polarity carefully, and install the batteries as shown in the illustration below.

STEP 3: Replace the battery compartment cover.

3. Operations

3.1 Volume and Mute

Volume Default: TV volume and mute through the TV, with the option of controlling volume and mute through the Cable. Refer to Section F for programming the volume and mute through your Cable.

3.2 Quick Set-Up Method

There are three ways you can program your remote:

* Quick Set-Up Method
* The Pre-Programmed 3-Digit Code Method
* The Auto-Search Method

The Quick Set-Up Method is a unique new feature that enables the fastest and easiest set-up by using one-digit codes for up to 10 major brands for each component.

The Pre-Programmed 3-Digit Code Method allows you to setup all the buttons at once by entering 3-digit code numbers that correspond to a specific Component's manufacturer/brand, so it's the fastest and easiest of the two methods. (Code Tables are on the backside of this Instruction Sheet) The Auto-Search Method scans through all the codes in the remote control, one at a time.

4. Button Functions

POWER

When you turn on your TV and DTA, press the POWER button.

CHANNEL + / -

Selects the higher or lower channel.

OK

Selects highlighted screen options.

MENU

Displays the on-screen menu.

VOLUME + / -

TV: Volume up or down.

INFO

Displays information about the program currently playing or highlights input on the current program.

TV, DTA

Press to select the component you want to operate and always return to that component.

LAST

Returns to the previously tuned channel.

5. Programming the Remote Control

There are three ways you can program your remote:

* Quick Set-Up Method
* The Pre-Programmed 3-Digit Code Method
* The Auto-Search Method

The Quick Set-Up Method is a unique new feature that enables the fastest and easiest set-up by using one-digit codes for up to 10 major brands for each component.

The Pre-Programmed 3-Digit Code Method allows you to setup all the buttons at once by entering 3-digit code numbers that correspond to a specific Component's manufacturer/brand, so it's the fastest and easiest of the two methods. (Code Tables are on the backside of this Instruction Sheet) The Auto-Search Method scans through all the codes in the remote control, one at a time.

6. Quick Set-Up Method

STEP 1: Press the component button you want to program, (e.g. TV, DTA).

STEP 2: Press and hold the [DEVICE] key for 5 seconds until the POWER LED will blink once and stays on.

STEP 3: Continue to hold the [DEVICE] key and press the number key assigned to your brand in the Quick Set-Up Table below and release the [DEVICE] key and number key to save the code. The POWER LED will blink twice to confirm that the code is stored.

STEP 4: Paint the remote control toward the component.

STEP 5: Press and hold the power button. If it turns off, it is programmed for your component. If it does not turn off, repeat the Pre-Programmed 3-Digit Code Method. Repeat the steps above for all components (DTV, TV).

7. Pre-Programmed 3-Digit Code Method

STEP 1: Press the component button to be programmed (TV, DTA).

STEP 2: Press the [COMPONENT] button (TV or DTA) to be programmed and OK button simultaneously for 3 seconds. The POWER LED light will turn on for 20 seconds indicating the unit is ready to be programmed.

STEP 3: Point the remote toward the Component and press the [CH +] or [CH -] button one step at a time or keep it pressed. The remote will emit a series of ON/OFF commands. Release the [CH +] or [CH -] button as soon as the Component turns On.

STEP 4: Point the remote control toward the Component and enter the 3-digit code number assigned to your brand.

STEP 5: Save the code. (Same as for 3-Digit Code Programming Method - Section C). If any of the functions do not work as they should, repeat from STEP 3 using [CH +] or [CH -] buttons to find the correct code.

8. Auto-Search Method

STEP 1: Turn on the Component you want to program (TV, DTA).

STEP 2: Press the [COMPONENT] button (TV or DTA) to be programmed and OK button simultaneously for 3 seconds. The POWER LED light will turn on for 20 seconds.

Example: (If you used the Auto-Search Method to program the TV, DTA)

F. Programming Volume Control

Volume and Mute control are factory-programmed to automatically transfer to the respective Component mode you select as follows:

DTA : DTA

TV : TV

However, you can program the volume controls (Volume Up, Volume Down and Mute) from one Component to operate in another Component.

If you wish to store the TV volume control in DTA mode, use the following steps:

STEP 1: Press the [DTA] button and the (OK) button simultaneously for 3 seconds.

The POWER LED light will turn on for 20 seconds.

9. Finding a Component Button's Setup Code Number

If you used the Auto-Search Method to program your Component, you may not know what the correct code number is. Here is a way for you to identify the code number, so you can record it for future reference.

STEP 1: Press the [COMPONENT] button (TV or DTA) you want to verify and the OK button simultaneously for 3 seconds.

The POWER LED light will turn on for 20 seconds.

Press the [INFO] button and count the number of times the Component LED light blinks. This number indicates the first digit of the code, followed by the second and third, each separated by a one second pause when the LED will turn off.

*Note: Blinks represents the number zero.
