Congratulations

Thank you for purchasing the Complete Control MX-890 color LCD screen universal remote control. This remote can directly control your devices via IR or wirelessly control your devices throughout the home using an RF base station. Controlling your home is simple with the MX-890 remote.

Brilliant 2" color LCD screen with pickup sensor
The MX-890 has a programmable 2” color LCD screen. When the remote is picked up, the color LCD screen as well as the remote buttons, will light up.

Control devices using ultra-reliable narrow band RF
The MX-890 can communicate directly to RF base stations, such as the MRX-1/RFX-250, MRF-350 and the MRF-260. It also natively communicates to URC Lighting via RF. This gives the MX-890 the ability to control your system without being in direct line-of-sight.

Identify a remote using Room Labels
Use the included room labels to keep track of each room’s MX-890. No longer will you have the kitchen remote in the living room; simply add a room label for easy identification.

Charging Base Included... no need for batteries
There is no need to constantly purchase batteries, just place the remote on the charging base and recharge the battery...DONE!

Fast setup of complex systems via Complete Control PC Program
To fully automate your audio/video system, the programmer must have detailed knowledge of each component and how the system is connected and operated. Only a trained and certified professional audio/video installer can program an MX-890 remote control in a timely and efficient manner.

User interface customizable for any activity
Each button is customizable for activities such as Watch TV or Listen to Radio.
